

Gold Bond launching juvenile line

David Perry, October 18, 2016

HIGH POINT – Independent bedding producer Gold Bond is introducing an upscale juvenile line of mattresses here that features an all-cotton ticking infused with anti-microbial copper to provide health and safety benefits.

The six-mattress collection is dressed in combinations of white, gray, charcoal and either lime green or hot pink accents.

Components include natural latex, micro coils, gel and high-resilience foam. Each of the mattresses is engineered with eight-inch profiles, ideal for use with bunk bed and loft bed rails. The mattresses are priced to retail from \$299 to \$549 in twin and are also available in full and queen sizes.

Hartford, Conn.-based Gold Bond shows in the International Home Furnishings Center in space M-610.
